

The diagram is a detailed wiring schematic for a car stereo system, organized into four numbered sections (1, 2, 3, 4) representing different components and their connections.

Section 1: Power Sources and Initial Connections

- (BAT) 25A AMP:** Connected to terminal 2 (BAT) and terminal 1 (AMP).
- (ACC) 7.5A RADIO NO. 2:** Connected to terminal 12 (IF) and terminal 6 (3L).
- (BAT) 15A RADIO NO. 1:** Connected to terminal 2 (BAT) and terminal 1 (AMP).

Section 2: Radio Receiver Assembly

The **F8(C), F11(F), F26(D) Radio Receiver Assembly** is connected to various terminals including +B, B, ACC, ATX-, ATX+, MUTE, SLD, R+, R-, L+, L-, SLD, IVO-, IVO+, and ANT. It also includes a combination meter and a shielded area for the antenna.

Section 3: Stereo Component Amplifier

The **F18(A), F19(B), F20(C) Stereo Component Amplifier** is connected to terminals +B, +B2, FL-, FL+, WFL-, WFL+, RL-, RL+, SL-, SL+, SR-, SR+, RR-, RR+, WFR-, WFR+, and ANT. It also includes a combination meter and a shielded area for the antenna.

Section 4: Speakers and Final Connections

- F21 Tweeter (Front LH):** Connected to terminals 12 (ACC) and 7 (AMP).
- I1 Speaker (Front Door LH):** Connected to terminals 1 (AMP) and 2 (AMP).
- O14 Speaker (Rear LH):** Connected to terminals 1 (AMP) and 2 (AMP).
- O15 Speaker (Rear RH):** Connected to terminals 1 (AMP) and 2 (AMP).
- H1 Speaker (Front Door RH):** Connected to terminals 1 (AMP) and 2 (AMP).

The diagram includes various connectors, junctions, and a combination meter, all labeled with their respective part numbers and functions.

Audio System (8 Speaker w/o Navigation System)

* 1 : TMC Made
* 2 : TMMK Made
